

Technical Service Information

REVERSE SHUDDER 1984 300ZX TURBO

APPLIED MODEL: 3584 300ZX turbo with automatic transmission. APPLIED VIN:

MODEL	VIN	TYPE	DATE
2 Seater Turbo	JN1CZ14S2EX016075	4N71B	4/84

Some 1984 300ZX Turbo models with automatic transmissions may exhibit a shudder while backing up in reverse gear. To eliminate this condition, the number of drive and driven plates in the low and reverse brake of 4N71B turbo automatic transmissions have been increased from 7 to 8 beginning with the Applied VIN below. Because of the additional plates, the transmission case has also been modified.

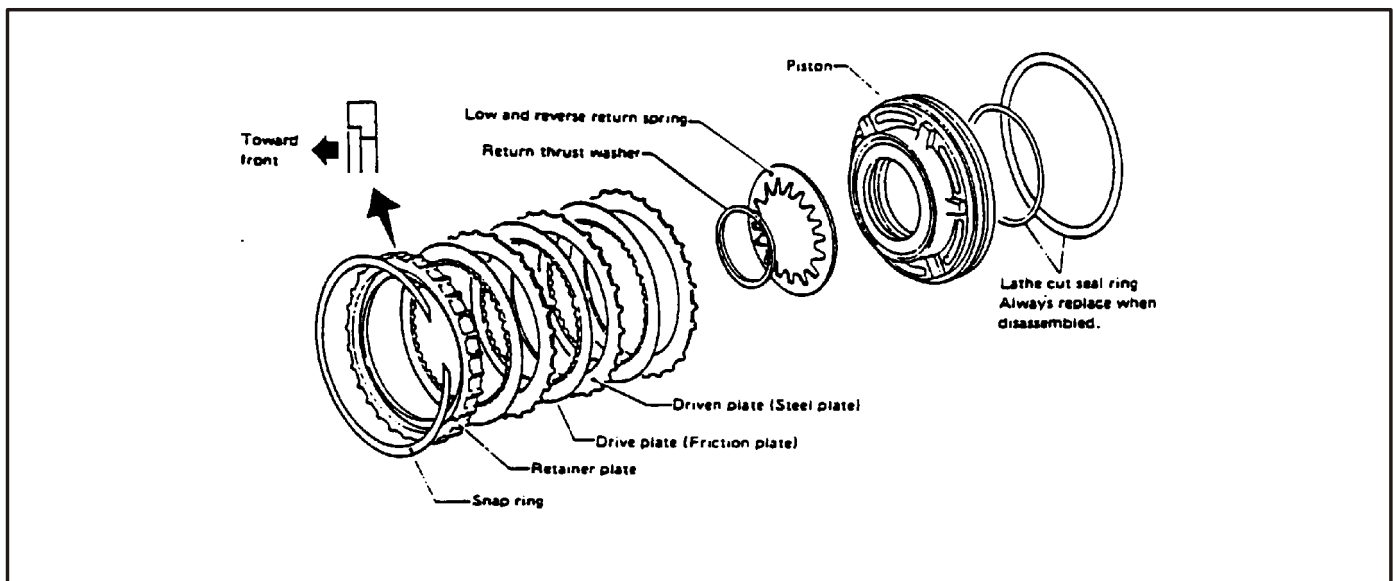

Figure 1

Technical Service Information

A/T TYPE	PART NAME		NEW PART NUMBER	FORMER PART NUMBER	INTER- CHANGEABILITY
