

Technical Service Information

NISSAN RE4FO3A SECOND GEAR STARTS

Information Only:

1991 -1992 Nissan Infiniti Q45 models with the RE4RO3A transmission are calibrated through the A/T Control Unit to start from a stop in second gear at less than 5/8 throttle. This is normal. The transmission will start in first gear if the throttle is opened to 5/8 or higher. The shift schedule for 1991-1992 Q45 models is shown in Figure 1.

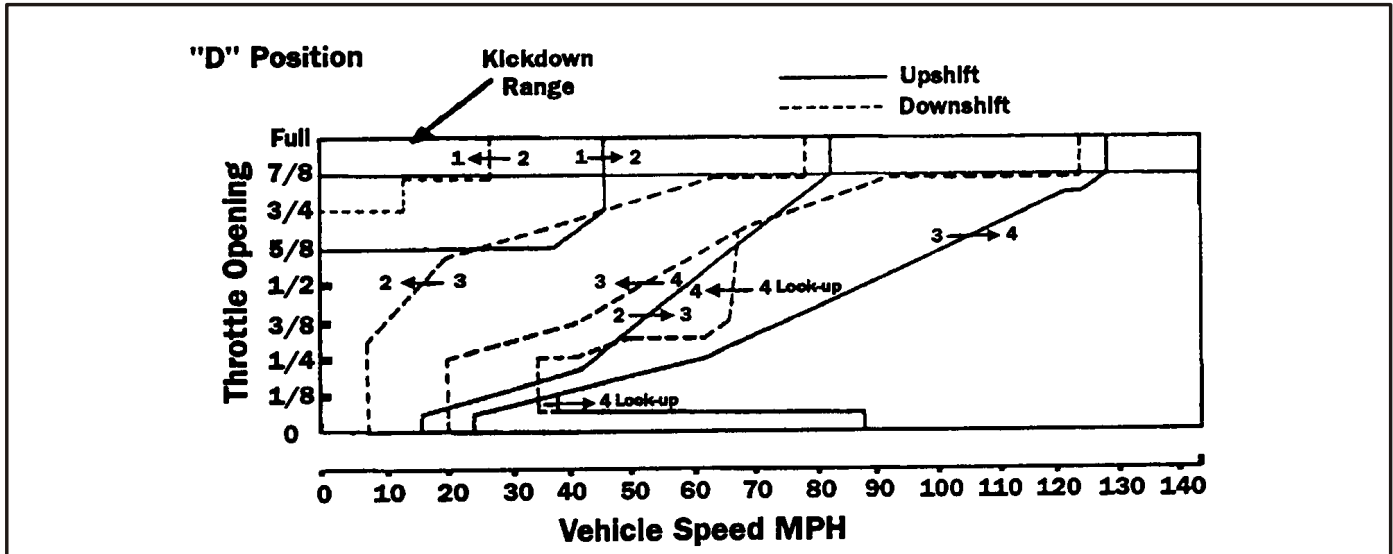

Figure 1

Information Only:

1993 Nissan Infiniti Q45 models with the RE4RO3 A transmission are calibrated to start in first gear from a stop under all conditions. The change was made to the program in the A/T Control Unit. The shift schedule for 1993 Q45 model is shown in Figure 2.
