

Technical Service Information

THM 4T60-E NEW REVERSE REACTION DRUM FOR 1997 MODELS

CHANGE: Beginning at the start of Production for 1997 models, all THM 4T60-E transaxles were built with a new design Reverse Reaction Drum, as shown in Figure

REASON: Greatly increased durability of the Reverse Reaction Drum.

PARTS AFFECTED:
(1) REVERSE REACTION DRUM - New design has been through a hardening process and can be identified by its blackened color, as shown in Figure 1.

INTERCHANGEABILITY:
The new design Reverse Reaction Drum will retro-fit back on all previous models of the THM 4T60-E transaxles.

SERVICE INFORMATION:
Reverse Reaction Drum (New Hardened Design) 24202422
