

Technical Service Information

FORD AODE/4R70W NEW DESIGN INTERMEDIATE ROLLER CLUTCH

There is now available from Ford Motor Co., a new design Intermediate Roller Clutch Assembly for the Ford AOD-E transmission. The new design roller clutch has stronger springs, and is identified by Green or Black plastic inserts as shown in Figure 1. The previous design level roller clutch has White plastic inserts.

The new design level Intermediate Roller Clutch Assembly will retro-fit back to 1992 model Ford AOD-E transmissions, and is available under OEM part number F4AZ-7AO89-A.
