

# Technical Service Information

## FORD A4LD COOLER LINE FITTINGS

There are currently two different size cooler line fittings for the A4LD case. The cases for the small fittings (1/2" Pipe Thread) are no longer serviced by Ford Motor Co. There are adapters available from Ford, for installing the small cooler line fittings into a large thread case, and are available under OEM part number E7TZ-7D273 -B.

However, the large black cooler line fitting from the THM 440-T4 transaxle will also fit in the A4LD large thread case, but you must remove and discard the ball and spring from the 440 fitting. (See Figure 1).
