

# Technical Service Information

## THM 4L60-E PUSH-IN COOLER LINE FITTINGS

**CHANGE:** Beginning at the start of production for 1996 models, all “C” and “K” Trucks and “G” Vans were built with a new design “Push-In” cooler line fittings for the transmission (See Figure 1).

**REASON:** Ease of installation at the Truck Assembly Plants.

**PARTS AFFECTED:**

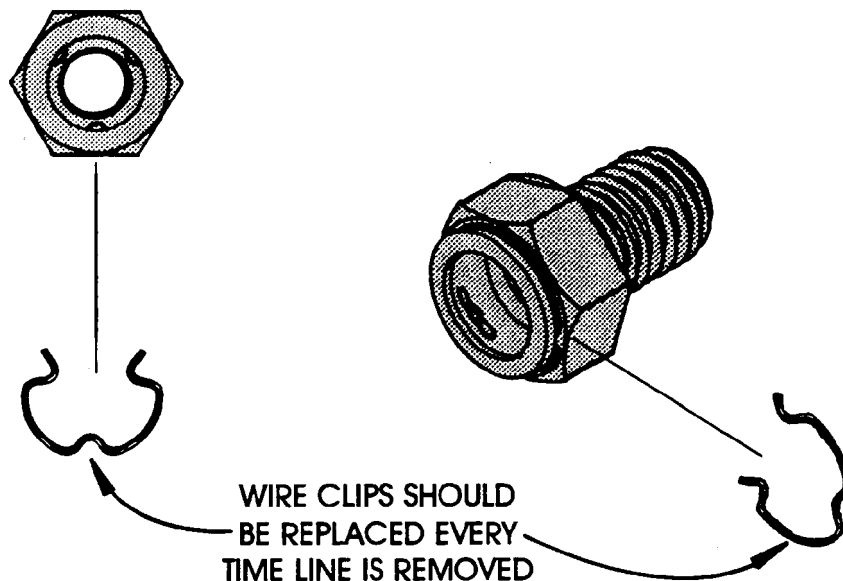

VEHICLE COOLER LINES - Modified oil cooler lines to accommodate the new design “Push-In” transmission cooler line fittings.

NOTE: General Motors recommends that the retaining “Clip” in the new design cooler line fittings be replaced every time that the cooler line is removed.

**SERVICE INFORMATION:**

Cooler Line Fitting (5/16” Lines) .....	8637742
Cooler Line Fitting (3/8” Lines) .....	865 1654
Cooler Line Fitting (Push-In) .....	24205 102
Cooler Line Fitting Retaining Clip (Push-In) .....	24205 103
