THM 3T40 (125C) NEW AUX VALVEBODY GASKETS FOR 1988 - UP

For 1988, approximately 15% of the THM 125C transaxles require a new auxiliary valve body cover gasket. The new gasket is being used in "N" body cars (Calais, Somerset, and Grand AM) ONLY at this time.

The new gasket has a larger hole than the 1987 gasket, and a dyed area on the gasket for identification (See Figure 1).

This now makes four (4) auxiliary valve body cover gaskets for the THM 125C, and they "CANNOT" be interchanged with each other (Figure 1).
